RSVP by :

June 17th to Jenesis Ramirez
305-348-4437 or jenramir@fiu.edu

• **SCIENCE**

Mastering science based skills to create a prosperous and engaging future

• **COMMUNITY**

Utilizing knowledge and skills gained to revitalize and enrich the community

• **ENGAGEMENT**

Expanding your knowledge of the latest breakthroughs in science and technology

• **FUTURE**

Enriching the South Florida community through science based student engagement

Why CorrStat—Because Diseases Can't Cure Themselves

Topic:

CorrStat allows people to share their health data online while protecting their privacy. CorrStat will provide researchers in the medical and related fields access to a research toolset that will drive new drugs and products to market quicker, while reducing their costs. CorrStat's groundbreaking technology will change how studies are done, if they are needed, or quickly determine if a current investigative approach will bear merit. Imagine obtaining viable clinical trial participants in minutes instead of months or years.

Speaker:

Michael Gregson began his career as an engineer at Bell Laboratories and has worked in various engineering, marketing, and management positions for major corporations such as Siemens, Fujitsu, Racal, Applied Digital Access, Hi/FN, Ameritec, and SimpleTech. While at these companies, Michael's leading edge designs solved problems years ahead of their time. He holds a Computer Science Degree from North Central College and an Electronic Engineering degree from Nashville State Technical Institute. Michael is the CEO at WaveFront Health Technologies and the Founder and Chairman of the Life Science & Technology HUB.

About the company

WaveFront Health Technologies is developing CorrStat, the world's first and only interactive health and lifestyle information network. Security and privacy are ensured by CorrStat's unique patent pending software.
