LST HUB's tag line, "Creating careers from ideas™" is more than just what it has done, it's how LST HUB was founded. The Life Science & Technology HUB was created when a need arose for resources to build CorrStat, an interactive platform idea using health data in real time. In 2009 resources were limited if available at all and a business ecosystem was needed that worked with the unique requirements of the life science and technology industries.

Five years later, LST HUB is an integral part of the South Florida community with members world wide. As a result of the HUB's monthly events and contacts companies have been created, people have found new jobs, entrepreneurs have found investors, and companies have utilized service providers they knew and trusted.

Join us as we talk about the growth of the LST HUB and its future. As for the CorrStat idea, tune in to get an update about this exciting idea that started the LST HUB and is now a working platform ready to change the way we view health data.
